CSL202 : Data Structures
Lab-1
01.08.2025

1. **Swap Two Integers Using Pointers**
   Write a function void swap(int *a, int *b) that swaps the values of two integers using pointers.

2. **Find Maximum and Minimum Using Pointers**
   Write a function void findMinMax(int *arr, int n, int *min, int *max) that finds the minimum and maximum values in an array and returns it using the pointer arguments min and max.

3. **Employee Salary Analysis**
   Define an Employee structure with ID, name, department, and salary. Take input for 5 Employees. Calculate the average salary and display employees earning above average.

4. **Book Records and Search by Author**
   Define a Book structure.
   - Title
   - Author
   - Price
   - ISBN

   Input 10 books and display all books written by a given author.

5. **Total and Average for Students**
   Define a structure Student with marks in three subjects. Take input for 5 students. Calculate total and average for each student.

6. **Find Most Expensive Product**
   Define a Product structure with ID, name, price, and quantity. Take input for 5 products. Find and display the product with the highest price.
