        HTML (HyperText Markup Language) is the standard markup language
        used to create and structure content on the web. <br>
        It uses tags to define elements such as headings,
        paragraphs, links, images, and forms, providing the semantic
        structure of a webpage;<br> CSS and JavaScript are then used
        to control presentation and behavior.
    </p>
    <!-- Paragraph about the what html is  -->
