Abstract
An abstract reflecting on the role of LaTeXin research writing...

Q1 Title, Abstract, and Structure

1 Introduction

This is an Introduction section. Euler's (1)

2 Methods

This is an Methods section.

2.1 Data Collection

This is an Data Collection subsection in the section of Methods.

2.2 Analysis

This is an Analysis subsection in the section of Methods.

3 Conclusion

This is the Conclusion section.

Q2 Cross-References with Equations

In the Introduction, refer to a "key formula" by its equation number. In the Results section, typeset Euler's identity:

$$e^{i\pi} + 1 = 0 \tag{1}$$

Label the equation and ensure that the earlier reference points to it correctly.

Q4 Table

Student	Math	Physics	CS
Alice	79	80	59
Bob	80	57	58
Charlie	79	36	69

Q4 Algorithm

if $i \geq 0$ **then**
 | print:Positive
end
if $i \leq 0$ **then**
 | print:Negative
else
 | print:Zero
end

Q5 Bibliography and Citations

This is Turing [1950] and [Knuth, 1997]
Turing [1950]
