Lab Bonus Questions

1. Write a program to compute the HCF and LCM of two numbers using functions.
   Write separate functions for HCF and LCM, and call them in the main function.

   Example:
   ```
   Input: Enter two numbers: 12 18
   Output:
   HCF: 6
   LCM: 36
   ```

2. Write a program to check if two numbers are co-prime using functions.
   Two numbers are co-prime if their HCF is 1.

   Example:
   ```
   Input: Enter two numbers: 5 9
   Output: 5 and 9 are co-prime numbers
   ```

3. Write a program to find the next prime number after a given number using functions.

   Example:
   ```
   Input: Enter a number: 10
   Output: Next prime number is 11
   ```

4. Write a program to calculate the sum of a series with alternating signs using a function.
   The series is: 1 - 2 + 3 - 4 + 5 - 6 + ... ± n

   Example:
   ```
   Input: Enter the value of n: 10
   Output: Sum of series: -5
   ```

5. Write a program to find the smallest and largest digit in a number using functions.
   Implement one function to extract the digits and another function to compare them.

   Example:
   ```
   Input: Enter a number: 4987
   Output: Smallest digit: 4, Largest digit: 9
```
