20 Sept Friday Lab Assignment

1. Write a program in C to calculate the sum of digits of a given number using recursion.
   example :
   Input : 12345
   Output : 15
   Input : 45632
   Output :20

2. Write a program in C to find the LCM of two numbers using recursion. >
   Example :
   Input 1st number for LCM : 4
   Input 2nd number for LCM : 6
   Expected Output :
   The LCM of 4 and 6 : 12

3. Print Fibonacci Series in reverse order using Recursion:
   Given an integer N, the task is to print the first N terms of the Fibonacci series in reverse order using Recursion.
   Examples:
   Input: N = 5
   Output: 3 2 1 1 0
   Explanation: The first five terms are – 0 1 1 2 3.
   Input: N = 10
   Output: 34 21 13 8 5 3 2 1 1 0

4. Write a program in C to find the mean of all elements of the array.
   Test Data :
   Input the number of elements to be stored in the array :3
   Input 3 elements in the array :
   element - 0 : 2
   element - 1 : 5
   element - 2 : 8
   Expected Output :
   mean of all elements stored in the array is : 5

5. Write a program in C to print all unique elements in an array.
   Example :
   Input the number of elements to be stored in the array: 4
   Input 4 elements in the array :
   element - 0 : 3
   element - 1 : 2
   element - 2 : 2
   element - 3 : 5
   Expected Output :
   The unique elements found in the array are: 3 5
